

# FIRE USE AROUND THE WORLD: PURPOSES, PRINCIPLES, POLICIES, AND PRACTICES

## Session 1: A worldwide view of the roles, status, and future of prescribed fire

In the inaugural seminar of this series, four fire experts will provide an overview of prescribed fire from different viewpoints, disciplines, and regions. They will discuss the role of prescribed fire in ecosystems, connections to culture and community, best practices and performance metrics for evaluating outcomes, and they will speculate on the future of prescribed fire. This overview will provide a foundation for future seminars, each of which will cover these topics in greater depth.
